

# nwgi - mini X-Stand

## Layout Guidelines

nwgi - mini X-Stand

### Make sure you are using the right guide!

nwgi has several different X-Stand models that have **different print sizes**. Using the wrong template will delay your project and will require a new file with the correct size to be submitted.

### What size should I make my file?

Your file should be sized 11" x 17". It is highly recommended that you don't have type go to the corners because a grommet may go through it. The grommets on this X-Stand are 1/4" in diameter.

### What Resolution should my files be?

nwgi recommends at least 150ppi at the size your file will be printed.

### What type of file should I submit?

nwgi recommends creating a PDF using the "Press Quality" setting. Do **not** place crop marks or extended bleeds. The PDF file you submit should be 11"x17".

We do accept different file types like Adobe Illustrator, InDesign, Photoshop and others. If you submit a native file you **MUST CONVERT ALL FONTS TO OUTLINES** and embed all your graphics.
